

Regional Support Centre Summer Conference

The Exchange, Bridgewater
Thursday 19th June, 2008

Richard Millwood
Core Education UK & University of Bolton

Can we
improve the future
with lessons from our
past?

Institute for
Educational
Cybernetics

1

Richard Millwood is founder and director of Core UK, a not-for-profit team devoted to innovation in learning and technology, across all phases and sectors in education and Reader in Distributed Learning in the Institute for Educational Cybernetics, University of Bolton.

Current research, consultancy and development contracts are with the UK Improvement & Development Agency, UNESCO, the UK Qualifications and Curriculum Authority and BECTa. Core UK is associated with Core NZ, based in Christchurch New Zealand. Richard is also establishing the National Archive of Educational Computing.

Richard co-developed the structure and ethos of Ultralab - one of the most successful innovation centres in learning and technology throughout the world, managing the research and

“People today have a dizzying feeling of being torn between a globalization whose manifestations they can see and sometimes have to endure, and their search for **roots, reference points** and a sense of **belonging.**”

- Jacques Delors 1996

“My roots are **England**, my reference point is **the Moon**, and my sense of belonging is to join the **global society of humankind.**”

“And I am a rank beginner.”

- Richard Millwood 2008

2

Orientation - no longer centred on the UK and nationalistic competition, belonging is now about making the globe work - all nations, all peoples. The view of the earth from the moon clarified that concept and the attack on the World Trade Center showed the failure to achieve it.

Council bans social networking

Workers at Kent County Council from using the social networking

The authority said it had restricted a electronic-use policy, and was one c take the step.

Some workers said they objected to i wasting time, and wanted it back on t "Like any other organisation, we have our IT systems secure," the council sa The authority employs 32,000 people.

28/08/2007
At least 32,000 council employees were blocked from the Facebook website at work yesterday.

The axe fell after Kent County Council found staff were spending too much time messaging friends from their desks.

A source said: "The hours we were losing to people using Facebook were getting ludicrous."

Now even the 84 elected councillors cannot use the authority's network to access the site, also banned by the Met police and Transport for London.

One frustrated worker commented: "KCC have blocked fb. You b*****s."

n Woodley, said: "You have your ere is always that element of trying to s and meet other people on there. can be difficult to know when to stop." om the University of Kent, said the site sset for creating communities between ployees can share experiences, and n learn about problems that exist in

Jonathan Garton said: "Employers are facing employees who are wasting a lot of time, who are ill-focused on their correct responsibilities. "Ultimately, they can be sanctioned. They can be disciplined for it, and we have seen employees ultimately dismissed."

So what about Web 2.0 and social networks - what do they mean? They clearly are 'dangerous' as these quotations about the reaction to the use of FaceBook shows.

Managing interpersonal
relationships

Creating
information
collectively

Web 2.0

5

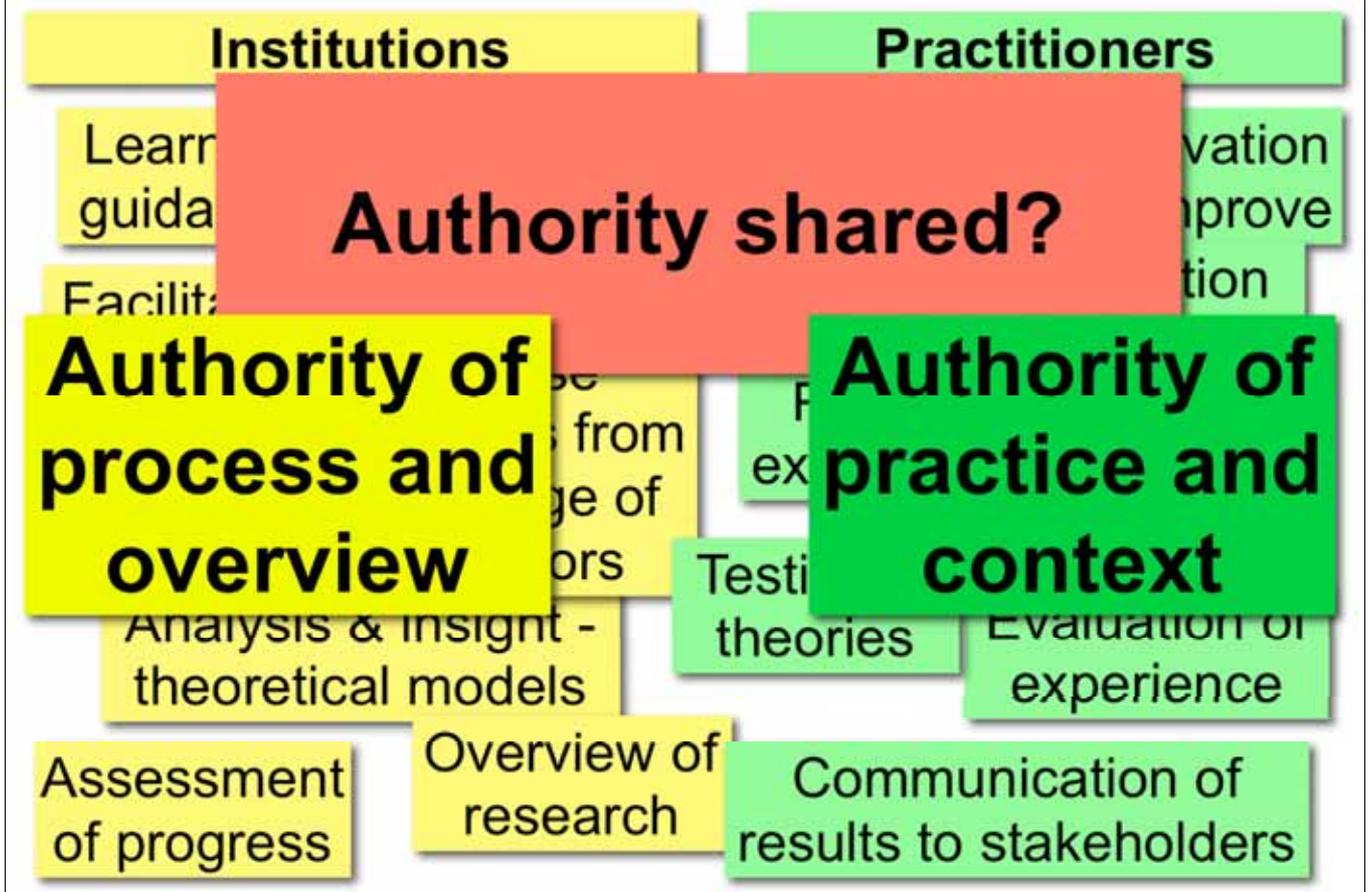

Social software appears to enable two important functions -
Creating information collectively and managing interpersonal
relationships.

Rethink:
creativity
attention
space
identity
authority

The explosion of information and interpersonal relationships that Web 2.0 and social software enables demands that we think 'outside the box' about these five issues - creativity, attention, space, identity and authority.

New rôles for institutions?

7

It is important to identify the rôle of the institution when the focus is on the student researcher and on their workplace.

In our view, although there are authoritative strengths in both university and workplace, this is a case of sharing authority, blurring the boundaries and extending the university into the workplace.

“The term 'social software', which is now used to define software that supports group interaction, has only become relatively popular within the last two or more years. However, the core ideas of social software itself enjoy a much longer history, running back to Vannevar Bush's ideas about 'memex' in 1945, and traveling through terms such as Augmentation, Groupware, and CSCW in the 1960s, 70s, 80s, and 90s.”

(Christopher Allen, 2004

Ben 12 England

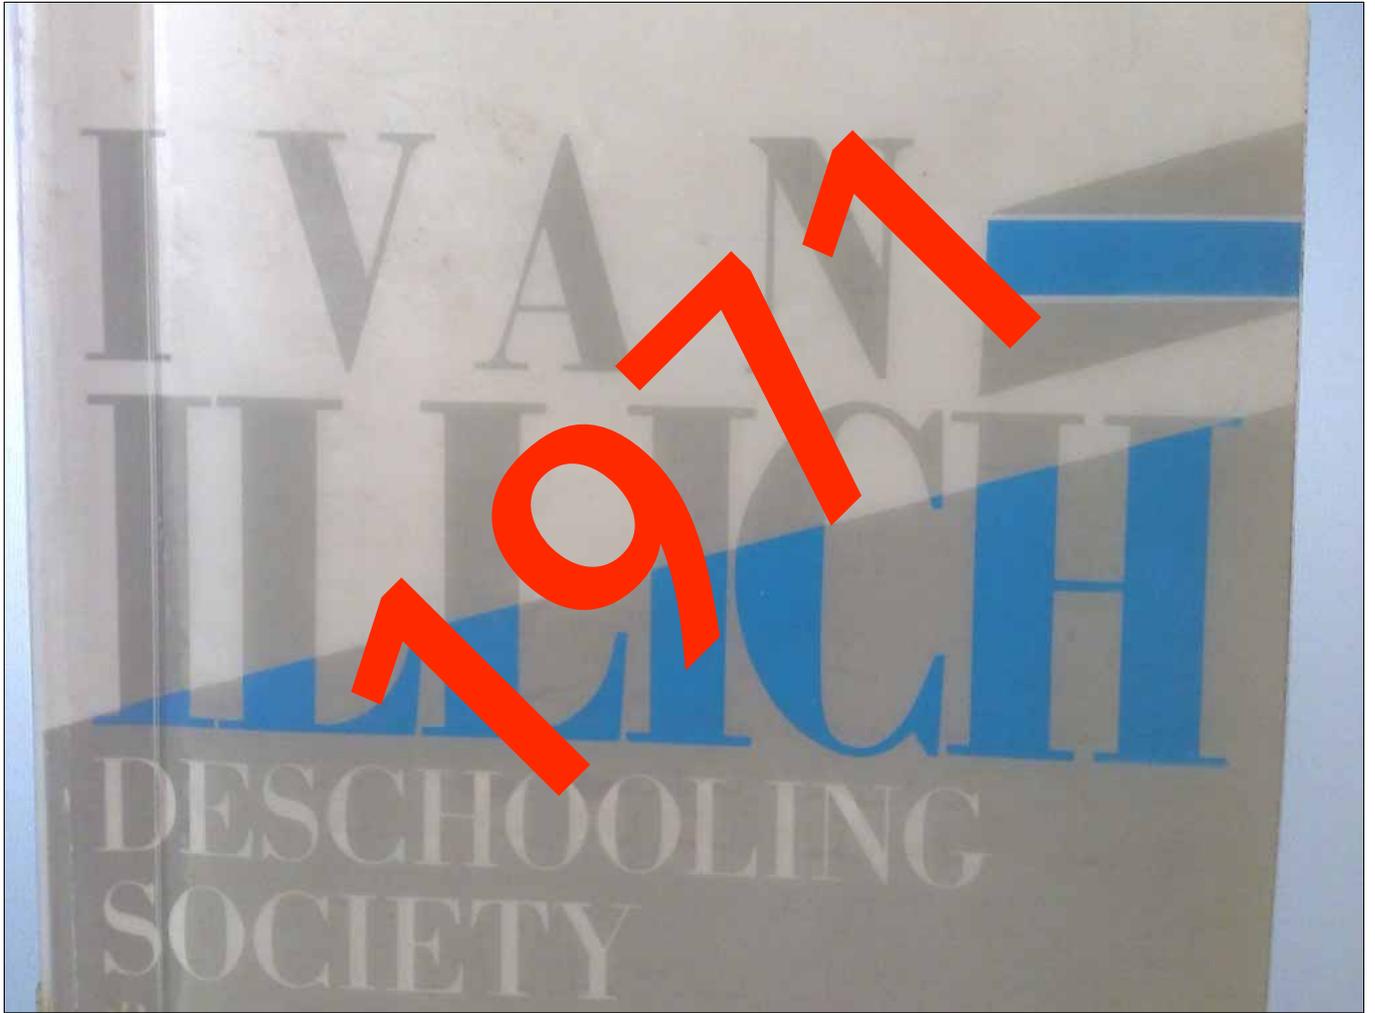

"Education is the same as it was fifty years ago, still using text books and writing and listening to teachers. And the answer to that is to use computers. But, if you use computers too much, how will you still keep social interaction which is a vital part of learning in all the students' lives?"

We've been doing this a long time

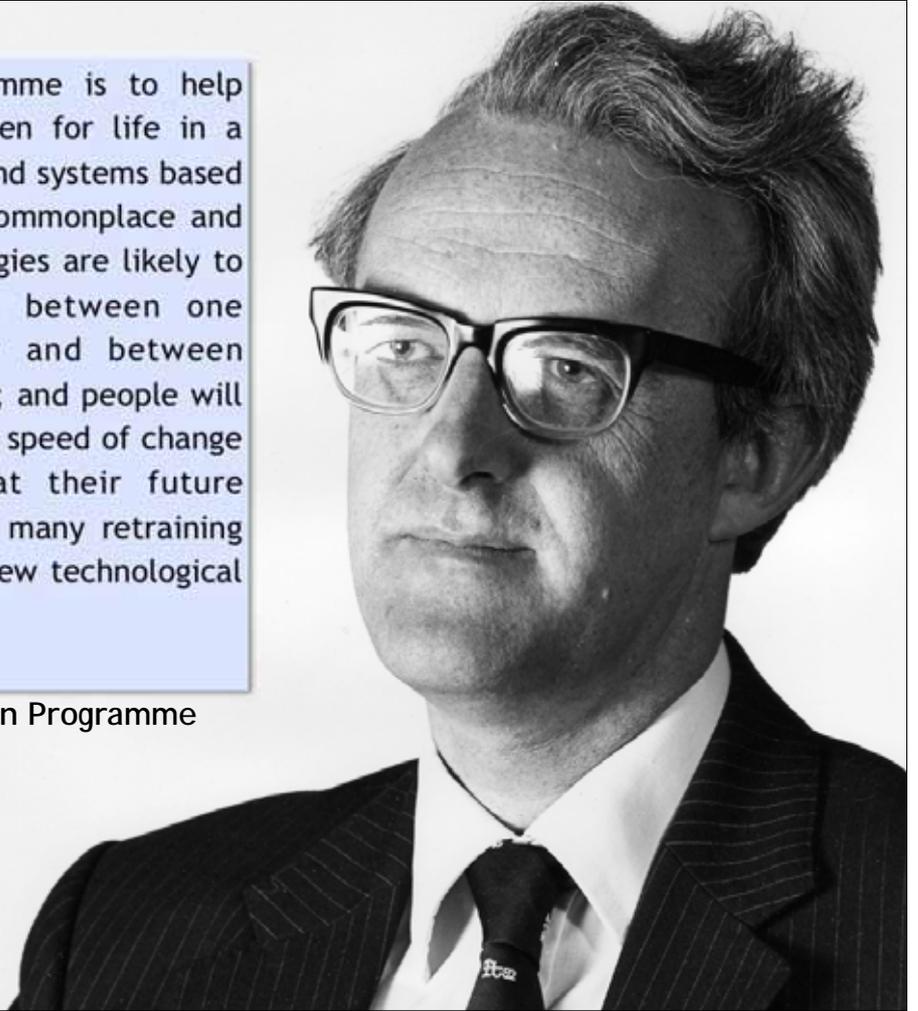

Thatcher and Muldoon meeting, also the year the Apple II arrived

“The aim of the Programme is to help schools to prepare children for life in a society in which devices and systems based on microelectronics are commonplace and pervasive. These technologies are likely to alter the relationships between one individual and another and between individuals and their work; and people will need to be aware that the speed of change is accelerating and that their future careers may well include many retraining stages as they adjust to new technological developments.”

(Perspective of the government)

Simon 15 England

"I find very much that our education is based around assessment and therefore we are given what is required to pass these exams at the highest possible ability. We might even be given the syllabus of what is expected. Therefore, Would it not be better to be given a greater depth of knowledge and a more true knowledge than just given what is required to do well in exams?"

John Dewey
from 'My Pedagogic Creed'
School Journal
vol. 54, pp. 77-80
(January 1897)

"In sum, I believe that the individual who is to be educated is a social individual and that society is an organic union of individuals.

If we eliminate the social factor from the child we are left only with an abstraction;

if we eliminate the individual factor from society, we are left only with an inert and lifeless mass. **Education, therefore, must begin with a psychological insight into the child's capacities, interests, and habits.**

Appreciation	the love of aesthetic form	“The emotions of a fulfilled imaginal sensibility are of a range and subtlety that outstrip the power of language to symbolize them. Hence they are conveyed by the non-discursive symbolism of drawing, painting, sculpture, music and dance.”
Interest	the love of knowledge	“When the need to understand is realized, we experience interest, extending into curiosity and fascination, the passion for truth, excitement in intellectual discovery, pleasure in the clear communication of ideas.”
Zest	the love of action	“The emotions involved in the fulfilment of free choice and effective action” including “relish, gusto, exhilaration, achievement and work satisfaction.”
Conviviality	the love of company	“The pursuit of ‘co-happiness’ & mutual fulfilment interpersonally & collaboratively, the pleasure of others’ smiles, laughter and contentment.”
Recognition	the love of achievement	“The pleasure in communal and societal valuation arising from achieving real outcomes, surpassing goals and exceeding expectations.”
Controversy	the love of dissent	“The rush of realisation that there is another view that may provoke personal enrichment and realignment.”

INNOVATORS WANTED

Masters in Learning with Technology

Want to design your own route to a masters degree?

Need to combine study with work?

Value learning with experts?

- Sign up for our 100% online, full-time masters degree – personalised to your needs and focused on the work you do.
- You will join a creative, supportive and vibrant community involved in learning with technology.
- Your experience, talent and research will be recognised through an assessment based on a portfolio of your work-based activities.
- Study with the Institute for Educational Cybernetics, recognised globally for its Centre for Educational Technology and Interoperability Standards (CETIS).
- Starting in September and January, with anticipated completion in 15 months.
